

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

Installed solar energy capacity Cumulative installed solar capacity, measured in gigawatts (GW).

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity ...

Renewable power capacity growth (GW) Renewable power capacity increased by 585 GW (+15.1%) in 2024. Over three-quarters of the capacity expansion was due to solar energy which witnessed an ...

Developers added 12 gigawatts (GW) of new utility-scale solar electric generating capacity in the United States during the first half of 2025, and they plan to add another 21 GW in the ...

The EPA estimated that its Solar for All program, enacted under the 2022 Inflation Reduction Act, will drive more than 4 GW of solar capacity additions over five years and reduce ...

Global renewable capacity is expected to increase over 5 520 GW during 2024-2030, 2.6 times more than deployment of the last six years (2017-2023). Utility-scale and distributed solar PV growth more ...

Hyperscaler demand accelerates solar-plus-storage By October 2025, US operating storage capacity reached 37.4 GW, up 32% year to date. Another 19 GW is under construction through 2026, with a ...

Paris/Houston, February 9, 2026 - TotalEnergies has signed two new long-term Power Purchase Agreements (PPA) to deliver 1 GW of solar capacity - equivalent to 28 TWh of renewable ...
