

We are expanding our portfolio to include the a-TroniX AX 5 kWh BAT, a high-performance storage solution for maximum independence in your power supply. This highly efficient ...

The AX series from a-TroniX offers a comprehensive solution for an efficient and sustainable energy supply. Our product range includes hybrid inverters, energy storage systems, heat pumps, an energy ...

Experience high-quality solar solutions from a-TroniX - from Germany for your home. Benefit from the highest quality, simple installation and sustainable energy.

The a-TroniX AX energy storage system with 2.88 kWh battery modules stores surplus solar power and makes it available exactly when it is needed. Thanks to its modular design, it can be expanded by up ...

It is designed to meet commercial and industrial needs for peak shaving, self-supply, electrical load and capacity enhancement, to improve energy efficiency and relieve peak pressure of power grid.

This phase includes a 185 MW solar plant and a 254 MW-hour battery storage system, enabling uninterrupted power supply for 4-5 hours. The entire project is slated for completion by ...

These three parts form a microgrid, using photovoltaic power generation to store electricity in the energy storage battery. When needed, the energy storage battery supplies the ...

With our AX series, which includes hybrid inverters, energy storage systems, heat pumps, our energy management system AX Core and wallboxes, you can offer your customers intelligent energy ...

The brand new range of single and three-phase hybrid inverters and solar power storage systems from our a-TroniX brand offers a high-quality modular solution for private homes and small business ...
