

SEA Consulting has carried out an assessment of the concentration of the electricity production market in Albania by calculating the 3 most widely used indicators:

In a significant development for the renewable energy landscape in Southeast Europe, Turkish developer Fortis Energy has commenced construction on a new solar power facility in ...

Fortis Energy has started the construction of solar power plant Ersekë with a capacity of 75 MW. The Ersekë Solar Power Plant project in Albania has transitioned to the construction phase, ...

The focus of the paper is to identify for the first time the most adequate energy storage systems (ESS) applicable in the central or bulk generation of the electricity sector in Albania.

Well, Tirana's new 84MW/168MWh battery storage system - the largest in Southeast Europe - is flipping that script. Operational since February 2025, this \$73 million project stabilizes a grid where ...

Summary: Albania is rapidly emerging as a leader in renewable energy adoption. This article explores how wind and solar energy storage projects are transforming the country's power grid, reducing ...

Masdar and state-owned power utility KESH signed a joint venture term sheet agreement to explore the development of gigawatt-scale projects in Albania. The renewable electricity plants, ...

Turkish renewable energy company Fortis Energy has is seeking EPC providers for the Ersekë Solar Power Plant in Albania, which combines 75MW of solar PV capacity with a 25MWh ...

Summary: The Albania Gravity Energy Storage Project represents an innovative approach to storing renewable energy. This article explores how gravity-based systems could transform energy storage ...

Summary: As Albania accelerates its renewable energy transition, the Tirana Energy Storage Planning Project emerges as a critical initiative to stabilize the grid and integrate solar/wind power.
