

Does a solar system qualify for a tax credit?

Residential Solar Tax Credit (Section 25D) - The 30% income tax credit for homeowners installing solar panels or batteries expires for any expenditures after December 31, 2025. In other words, a home solar system placed in service in 2026 will not qualify for a federal tax credit under current law.

Are solar panels tax deductible?

If you own a rental property and install solar panels, you may be eligible for a business tax credit. Although both can be used to lower your tax bill, tax deductions reduce your amount of taxable income, while credits decrease the amount of tax due. Learn more about tax credits, deductions, and refunds.

When can I claim a solar panel tax credit?

The solar panel system must be turned on during the tax year in which the credit is being claimed. For example, if the panels are installed in December 2024, but the system isn't inspected and turned on until January 2025, you can't claim credit until you file your 2025 tax return.
