

The projection is Modo Energy's expectation of how much capacity will actually come online. This is based on the development status of projects in the pipeline, alongside historic project trends, including delays and ...

This is the fourth edition of the Clean Energy Council's half-yearly report monitoring the progress of the deployment of rooftop solar and behind-the-meter energy storage systems in Australia.

Funded under ARENA's Large Scale Battery Storage Funding Round, each battery will be equipped with grid-forming inverter technology, allowing them to provide essential system stability services ...

This report is a comprehensive analysis of the Australian energy storage market, covering residential, commercial, large-scale, on-grid, off-grid and micro-grid energy storage.

The AES Cabinet 10 and Cabinet 50 are pre-wired, plug-and-play enclosures designed to house 2 and 10 AES 51.2V battery modules respectively, providing scalable energy storage solutions for residential, commercial, ...

In December 2022, energy ministers agreed to support the design of a Capacity Investment Scheme (CIS) in order to encourage investment in new dispatchable capacity into Australia's energy grid.

The paper reviews energy storage technologies and their applicability to the Australian National Electricity Market (NEM). The increasing dynamic variability between maximum and minimum operational ...

Operating a reliable low-carbon power system means that energy storage is imperative - and AEMO also makes this clear. It says building the energy storage to manage daily and seasonal variations in ...

This CIS will provide an additional 26 gigawatts of renewable generation. Today, that's enough to power every home connected to the main grids across Australia, plus an additional 14 gigawatts of ...

The report responds to common challenges around decarbonisation and technology readiness, examining the role of storage for seven sectors, and outlining the strengths and weaknesses of specific technology options.
