

Immerse yourself into the realm of pack assembly and end-of-line (EOL) testing with our animation, crafted to showcase the custom solutions offered by Bosch Rexroth for battery manufacturing.

We work with automotive and battery OEMs to create an automated assembly and testing process for high-throughput EV battery module production. Our solutions automate cell handling, sorting, and ...

We stand for long-lasting innovations: from individual robots to complete production lines. Our expertise is in the planning, design and commissioning of turnkey production lines for battery modules and ...

We offer a range of options for the fast and efficient charging of EV batteries during the manufacturing stage. Including AC and DC options from 3kW to over 360kW. Applications to support load and ...

For cell/module pack assembly, PIA Automation offers flexible and highly automated systems for the efficient production of battery cells, modules, and battery packs. These systems are scalable, ...

Discover the key features of a modern battery pack assembly line and how expert design and automation can boost performance, flexibility and output.

Automated assembly line, cylindrical battery production, laser welding, energy storage. 2: Introduction: This production line is suitable for over 90% of cylindrical products in the market, with a high degree ...

Earlier, we highlighted the key challenges in developing a fully automated battery manufacturing line. Now, we look at how DWFritz and Bosch-Rexroth partnered to identify and overcome these ...

Contact us today to learn how our battery assembly automation solutions can transform your production line and deliver the performance you need in today's fast-paced market.

Re:Build designed and implemented an automated lithium battery production and assembly system, optimizing materials handling, equipment integration, and process automation to increase ...
