

From the outside, the solar-powered treehouse has a modern profile that is punctuated with many large windows to let in plenty of natural light. The Baltic was built using techniques that...

As someone who's always been fascinated by the idea of embracing a more sustainable, self-sufficient way of life, I recently decided to take the plunge and build my very own solar-powered ...

Big Tree Solar Project is a ground-mounted solar project which is planned over 1,400 acres. The project is expected to supply enough clean energy to power 40,000 households.

Affordable solar and wind power generators for whole-home backup and off-grid home living. Plug-and-play renewable energy solutions since 2015. Shop now!

Nature's Generator Powerhouse is a complete home power system that can easily be upgraded with Powerhouse Power Pods, and you can add as many Powerhouse Power Pods as you ...

Ted and I wanted a way to keep the treehouse and bathhouse powered without needing to haul power stations back and forth, so we build a portable solar trailer to keep all the batteries and...

Despite numerous windstorms over the years, this grid-tied solar tree house has served us well over the years saving us hundreds of dollars every year in electric bills. The solar tree house has now paid for ...

Minimize your environmental impact by striking a balance between your solar energy generation and tree preservation. Explore alternative shading solutions like bypass diodes, microinverters, or power ...

POWER to the Tree House: Bring Electricity to Your Tree House Without Using a Generator with the use of a DC to AC power inverter and solar panels.

We've explored the boundless potential of merging renewable energy with tree house living--venturing from sun-soaked solar panels and breezy wind turbines to the hidden gems of ...
