

Renewable energy sources like solar and wind are not always available when needed. BESS step in to bridge the gap. By storing excess renewable energy, BESS ensure a steady supply even when the ...

Massachusetts is making a big push for batteries -- not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid. State officials...

A Massachusetts pilot program provides a replicable and scalable model for bringing renewable energy, battery storage, and electrification to low-income households.

The signs show opposition to a proposed 180-megawatt energy storage facility slated for a 43-acre site off Coldbrook Road.

As Massachusetts moves to streamline the approval process for large-scale energy-storage projects, small towns including Blandford and Oakham find themselves at odds with ...

RE+ Northeast is an annual event that brings together clean energy professionals from across the northeast region of the United States. The event features keynote speakers, panel discussions, ...

It's not just about lowering costs; it's about making rural life more resilient, practical, and sustainable. Here are eleven ways solar + storage is proving its worth.

RE+ Northeast 2026 took place at the Thomas M. Menino Convention & Exhibition Center in Boston from February 3 to February 5, 2026. Organized by the Solar Energy Industries ...

In a new study by SEIA and Synapse Energy Economics, researchers compared a future where Massachusetts continues to add new solar and storage capacity as planned through 2030, with a ...

Interactive map of battery storage projects in Massachusetts. View project locations, the largest developments, and capacity data.
