

This Bucharest energy storage record isn't just a local win--it's rewriting the playbook for urban sustainability worldwide. Let's unpack how they did it, why your city should care, and what ...

Bucharest's updated planning signals consistent backing for renewables through 2030 and beyond. Solar remains central to Romania's decarbonisation strategy, and flexibility -- ...

Silmaril will build and operate necessary infrastructure, using best-in-class storage technologies, to provide flexibility to the grid, enabling the clean energy revolution and delivering attractive returns

Romania is emerging as a key market for renewable energy storage. Explore the main laws, incentives, and opportunities shaping investments in batteries and hybrid storage projects.

Based on the EU context and planning a significant uptake of renewable energy sources in its electricity mix over the following decades,Romania must also develop a strategy for the ...

Hosted at the JW Marriott Bucharest, this one-day event will bring together industry leaders, policymakers, and key stakeholders to explore the booming opportunities in Romania's solar ...

In April, Romania's largest battery storage system, of 24 MWh, was put into operation. It is the first phase of a project totaling 216 MWh. The facility is connected to the Mireasa wind farm of 50 ...

But here's the kicker: 68% of Romania's power still comes from aging fossil fuel plants. With grid reliability becoming sort of a guessing game during peak summers, photovoltaic energy storage isn't ...

The 750 MW facility, located in Giurgiu county near Bucharest, will surpass Germany's current largest solar park. A key feature of the project is a massive 1.07 GWh battery energy storage ...

Apartment blocks in Bucharest and other major cities in the country represent an untapped resource for energy production. The rooftops of these buildings can be transformed into ...
