

Slovenian energy company GEN-I will manage a 200 MW battery storage portfolio in Bulgaria, marking a significant expansion of its energy services in Southeast Europe.

The company has semi-automated production line, located in Sofia, Bulgaria, providing lithium-ion battery packs for various applications, including e-bike industry.

Our production in Plovdiv includes all common battery systems (Li-Ion, Li-Polymer, NiMH, lead, etc.). Primary batteries (lithium, alkaline batteries) can also be assembled for your specific application.

Bulgaria-based International Power Supply (IPS) is opening a factory for battery energy storage systems, using proprietary technology. The Exeron X-BESS is one of only six strategic ...

This makes Bulgaria one of six European countries with a project listed in the EC's public register of strategic projects and puts the country on the world map of energy storage technology ...

A Bulgarian project for manufacturing batteries for energy storage has been granted strategic status under the European Clean Technology Initiative, the Ministry of Economy and ...

Bulgaria Lithium Ion Cell and Battery Pack Market is expected to grow during 2025-2031

Bulgaria's involvement in the global battery supply chain is becoming more pronounced, especially with the rise in demand for electric vehicles. This trend highlights the importance of understanding ...

International Power Supply (IPS) has officially launched Factory X1, marking the opening of Bulgaria's first battery energy storage system (BESS) gigafactory.

International Power Supply (IPS) has officially opened its new battery energy storage system (BESS) manufacturing facility near Sofia, Bulgaria - a site recognized by the European ...
