

Bulgaria's new energy-saving energy storage system

Integrated solar and storage systems are emerging as a key solution to address grid fluctuations and enhance the efficiency of renewable energy utilization. Known as the "Country of ...

Energy storage in Bulgaria is expanding rapidly as the government awards nearly 10 GWh of capacity to 82 projects, boosting renewable energy reliability and grid stability.

RESTORE 2 was launched in August 2025 with the goal of supporting the construction and commissioning of national infrastructure from renewable energy storage facilities with at least 1.9 ...

The tender was launched last year, aiming to significantly increase the share of renewable energy, mainly wind and solar, in the country's energy mix. It would also contribute to ...

At EVN Bulgaria, we recognise battery energy storage as a cornerstone of future energy markets. Our strategic focus is on delivering high-value services that go beyond technology: ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into ...

Bulgaria approves funding for 31 battery energy storage projects totaling 4 GWh under the RESTORE 2 program.

Bulgaria has inaugurated a 124 MW / 496.2 MWh battery energy storage system (BESS) in the town of Lovech, described by the Ministry of Energy as the largest such installation currently ...

Bulgaria has taken a major step forward in its renewable energy strategy with the inauguration of a 124 MW / 496.2 MWh battery energy storage system (BESS) in the north-central ...

The RESTORE tender is funded under Bulgaria's National Recovery and Resilience Plan (NRRP), which aims to significantly increase the share of energy from renewable sources in the ...
