

Why should you create your own parametric cabinets?

Crafting your own parametric cabinets grants significant control over designs and saves considerable time. Instead of hunting for the perfect pre-made cabinet or manually tweaking dozens, you can develop one adaptable family suitable for various situations.

How do I change the size of a cabinet?

Instance parameters allow changing the value for each cabinet placed. For standard dimensions like width, depth, and height, Type is commonly used. Under "Group parameter under", select Dimensions. Click OK. Repeat this for the dimension between Front and Back, naming the parameter something like "Cabinet Depth".

How can a user customize a cabinet?

Users can adjust construction methods, colours, materials, and hardware settings tailored to individual cabinets while ensuring dynamic changes that respond intelligently to modifications. While Section View and Properties offer extensive control, users should strategically utilize Face Plan and End View modifications.
