

Can people live in a house with photovoltaic panels installed on the roof

What if my roof is not suitable for solar?

If a solar professional determines that your roof is not suitable for solar, or you don't own your home, you can still benefit from solar energy. Community solar allows multiple people to benefit from a single, shared solar array that can be installed on- or off-site.

Can solar panels be installed on a roof?

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. If there are trees near your home that create excessive shade on your roof, rooftop panels may not be the most ideal option. The size, shape, and slope of your roof are also important factors to consider.

Should I have solar on my home?

For now, to avoid EMF's, including unwanted rf radiation, unfortunately, it would help NOT to have solar on one's home, nor to be close by neighbors with solar. Solar is yet another type of product marketed to us without adequate safety evaluations.

Are solar panels safe?

While solar technology is generally considered safe, the public has raised certain health concerns, which typically fall into three categories: electromagnetic fields (EMFs) and radiation, chemical exposure from the materials used in solar panels, and the potential thermal impact on homes and neighborhoods.
