

Chile is leading Latin America's wave of energy storage adoption, closely linked to its embrace of solar PV, as these recent stories from our colleagues at PV Tech attest.

The newly commissioned phase, known as Gabriela, incorporates 272 MW of solar PV capacity and 1.1 GWh of lithium-ion battery storage, enhancing the project's ability to deliver ...

The Elementa 2 storage solution selected for the project is engineered for extreme environments like the Atacama Desert, combining high energy density, long lifecycle, advanced ...

Chile PV 3, located in Antofagasta reached COD in 2014 and at that time, it became the largest PV asset connected to the Chilean electrical grid. We own approximately a 35% stake and have a ...

Zelestra will develop a 220 MWp of solar Photovoltaic and 1 GWh of energy storage capacity in Chile. Solar and storage projects are crucial in Chile's decarbonization goals for ...

Located in the northern region of Tarapacá, the hybrid plant has already started construction and will have 220MW of solar capacity and 1GWh of battery energy storage system ...

Chile will need new renewable energy storage systems to replace its current backup capacity of coal-fired plants and natural gas-powered combined cycle turbines and improve the ...

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022.

As a leading global power company, AES has a substantial presence in Chile, combining solar with energy storage to provide firm, dispatchable renewable power. Their investments in hybrid projects ...

California-based Nextracker, along with ENGIE Chile, in May announced an energy initiative called PV and BESS Libúla, which consists of a hybrid park of photovoltaic panels and ...
