

Ultimately, energy storage is poised to play multiple critical roles within our power system. Therefore, accelerating the ongoing regulatory changes is urgent, with the goal of effectively reducing system ...

The collaboration is set to enhance the Aurora hybrid project in Tarapacá, Chile, with Sungrow providing its advanced PowerTitan 2.0 liquid-cooled BESS and MV power conversion units.

By building a new energy structure that integrates light, energy, and storage, Chile is gradually establishing a more flexible, efficient, and clean power system, breaking away from dependence on fossil ...

This collaboration reflects our shared commitment to accelerating the energy transition in Chile and across the region, while ensuring a reliable, sustainable power supply for Chilean homes.

Discover how Chile's rugged landscapes and renewable energy potential are driving innovation in outdoor power solutions for mining, agriculture, and emergency services.

Chile is making significant strides in harnessing its abundant solar energy potential, yet it faces critical challenges such as solar curtailment and grid constraints.

Learn how the Aurora project in Chile is setting a new standard for clean, renewable energy.

Discover how Battery Energy Storage Systems (BESS) are transforming Chile's energy landscape, particularly in outdoor power supply applications, and learn why this technology is critical for sustainable development.

BESS Opportunities in Chile BESS Opportunities in Chile Battery storage projects cannot come soon enough for Chile. While Chile has been at the forefront of renewable energy generation growth in Latin ...

Wind power is Chile's second most developed source of renewable energy. In 2024 alone, wind power plants delivered 11.1 GWh of energy. Currently, there are five wind projects under evaluation, 26 in the ...
