

Chilean Industrial and Commercial Energy Storage Investment Project

The project aims to support the integration of large-scale solar projects into the Chilean grid, helping to reduce CO₂ emissions in the region. BESS (battery storage system) technology will ...

Copenhagen Infrastructure Partners has made a final investment decision for a 1,100 MWh energy storage system in Chile, marking a major advancement in the country's renewable energy sector.

With 23 energy storage projects already approved, totaling an impressive 3,000 MW of capacity, Chile is at the forefront of innovation and efficiency in Latin America.

Founded in 2012, CIP focuses on investment in energy storage, transmission, and distribution; wind, solar, biomass, and advanced bioenergy; energy from waste; and power-to-X.

Copenhagen Infrastructure Partners (CIP) has made a final investment decision (FID) on a 220MW battery energy storage system (BESS) in Chile. The Arena BESS project, located in the ...

Having launched a national storage strategy in 2023 that sets targets and aims to attract investment in the sector, and with a large pipeline of projects on the way, Chile's installed storage ...

Copenhagen Infrastructure Partners (CIP), through its Growth Markets Fund II (CI GMF II), has made the final investment decision (FID) on a 220 MW/1,100 MWh battery energy storage ...

Construction of the standalone project is expected to start in the first quarter of 2025 and powered as soon as Q1 2026, and will be one of the first projects of its kind to reach commercial ...

Copenhagen Infrastructure Partners (CIP), through its Growth Markets Fund II (CI GMF II), has taken final investment decision (FID) on a 220 MW / 1,100 MWh battery energy storage system in...

Chile will need new renewable energy storage systems to replace its current backup capacity of coal-fired plants and natural gas-powered combined cycle turbines and improve the ...
