

The project, announced during the Abu Dhabi Sustainability Week, represents a significant step forward in the development of round-the-clock gigascale combined solar and energy ...

Energy After the mandate: China's energy storage sector one year on With clean energy projects no longer needing to be bundled with energy storage, companies are finding new ...

China continued its high-growth energy storage market expansion in July 2025, with 1,556 new energy storage-related projects filed for registration, according to the Energy Storage...

This is the country's first integrated offshore facility that combines PV power generation, hydrogen production, refueling and energy storage, all within a framework of comprehensive energy ...

In terms of storage allocation policies, Xinjiang, Tibet, Inner Mongolia, and Gansu regions are required to equip a certain proportion of storage facilities in new energy projects.

The world's first intelligent grid-forming photovoltaic and energy storage power station, tailored for ultra-high altitudes, low-temperatures and weak-grid scenarios, has been connected to ...

China's 600 MW compressed air energy storage plant proves grid-scale power storage can scale without lithium or battery minerals.

"China's largest" integrated offshore photovoltaic (PV) demonstration project, combining solar power, hydrogen production and refueling, and energy storage, has been connected to the grid ...

By leveraging coastal tidal flat resources and employing advanced PV technologies and intelligent control systems, the project maximizes energy conversion and storage efficiency. ...

The base, constructed by Power Construction Corporation of China (POWERCHINA), is the country's first project integrating the use of hydro and photovoltaic power as well as energy ...
