

One of the most ambitious solar projects in history is quietly heading for shutdown after just a decade of operation. The Ivanpah Solar Power Facility in California's Mojave Desert was once...

The Trump administration wants to see this unusual power plant closed, and in a rare instance of alignment, the Biden administration did, too.

The landmark Ivanpah solar energy plant along Interstate 15 near the Nevada-California border is past its prime, left in the desert dust as more efficient technology is producing power ...

A giant solar plant touted as a symbol of federally financed efforts to fight climate change is on the path to being closed, renewing a debate about the track record of the Department of ...

California built a \$2.2 billion solar thermal project in the Mojave Desert in the early 2010s, with 75% of it funded by the Obama administration through loan guarantees. The project, the ...

Headlines have been circulating major news outlets around the impending closure of the Ivanpah Solar Power Facility, a \$2.2 billion project that began construction in 2010 and has been ...

If regulators approve the contract terminations, two of the plant's three units will close in 2026, and the site may be repurposed for photovoltaic solar panels.

The partially taxpayer-funded Ivanpah Solar Power Facility in California's Mojave Desert is set to shut down in 2026 due to inefficiency in generating solar energy, according to the New York...

Two Ivanpah units are slated to close starting in 2026, per a January 2025 announcement pending CPUC approval. Here's the original context and what repurposing could look ...

Construction began in 2010 and was completed in 2014. Now it's set to close in 2026 after failing to efficiently generate solar energy.
