

In its approach to delivering a 100% renewable energy target across 12 islands by 2020, the Cook Islands presents a rare insight into how planning requirements of high penetration renewable island systems vary ...

The projects successfully delivered mini-grids on four islands within the Southern Group of the Cook Islands - Atiu, Mangaia, Mauke and Mitiaro and significantly upgraded the medium and low voltage networks on two of ...

As a result of this Project, approximately 1,550 residents on the Islands of Mitiaro, Atiu, Mauke and Mangaia will be able to receive up to 24 hours of electricity from renewable sources.

Over the past two years, Infratec has designed and delivered solar/battery mini grids and new underground network distribution systems on the Islands of Atiu, Mangaia, Mauke and Mitiaro.

Major commercial projects now deploy clusters of 15+ systems creating storage networks with 80+MWh capacity at costs below \$270/kWh for large-scale industrial applications.

Although nearly all households in the Cook Islands are connected to grid electricity, only 5.5% of households have additional solar photovoltaic systems installed, and 1% use small diesel generators. Several actions ...

The H2MG project is a research, development, testing and evaluation effort to demonstrate and assess the feasibility and performance of the solar-H2 storage and off-take systems to support island-able microgrids.

The paper classifies microgrid control strategies into three levels: primary, secondary, and tertiary, where primary and secondary levels are associated with the operation of the microgrid itself, and tertiary level ...

The workshop, which was co-hosted by SolarCity, provided a chance to conduct detailed conversations with representatives from the national utilities of the Cook Islands, Palau, the Republic of the Marshall Islands, ...
