

Cost of a large-scale cabinet system for russian base stations

How many base stations are there in Russia?

According to Vedomosti, by the end of November 2020, there are about 90 thousand base stations in the Russian capital, and with the launch of 5G networks, the number of such equipment will at least triple.

When will a base station be built in Russia?

This applies to base stations of GSM, LTE and 5G standards. Minister Shadayev noted that mass production of base stations for LTE and 5G communication networks is planned to begin in 2025. The goal of the project is to provide Russian telecom operators with modern high-tech equipment of domestic production.

Will Russian base stations be used in small settlements?

According to him, under these contracts, the Ministry of Digital Development will provide targeted financial support to manufacturers. Shadayev also explained that Russian base stations will be used initially in small settlements.

Why should Russia develop a base station?

The initiative to develop and produce domestic base stations is part of a broader import substitution strategy in Russia's telecommunications industry. The implementation of this project should help strengthen the country's technological independence and develop the national communications infrastructure.
