

A horse-drawn carriage passes a photovoltaic park in Yaguaramas, Cienfuegos Province, Cuba, where hundreds of workers are hastily installing 44,000 solar panels.

Cuban authorities emphasize that these solar projects align with broader plans to modernize energy systems while reducing outages. The locations chosen for the plants span multiple provinces, ...

Cuba Accelerates Solar Power Expansion to Counter U.S. Fossil Fuel Restrictions February 5, 2026 at 4:12 PM GMT+0 V By Vlad Chernikov, Chief editor

Beyond the expectations for the opening of the solar parks and the possibility of easing the country's energy crisis, how is the overall plan progressing, and what challenges does it face in becoming ...

Cuba Aims for Energy Independence with Expanded Solar Projects in 2026 In a decisive move toward greater energy sovereignty, Cuba is turning to its most abundant natural resource--the sun. Amid a ...

Amidst an unprecedented energy crisis, the Cuban government has unveiled an ambitious plan aiming to produce nearly 600 MW of solar photovoltaic energy by the first half of 2025.

Cuba launches new solar parks aiming for 2,000 MW by 2028, tackling energy crisis with Chinese-backed tech and renewable energy investments.

Chinese and Cuban authorities signed an investment agreement to jointly implement a project to expand the use of renewable energy. In the short term, the investment project consists of installing...

Understanding Cuba's New Solar Energy Initiative What are the new opportunities for solar panel ownership in Cuba? The Cuban government is allowing workers to purchase solar panels, offering incentives ...

Cuba will allow workers to purchase solar modules and sell renewable energy to third parties in an effort to alleviate the energy crisis. These measures come amid blackouts and fuel shortages.
