

The energy regulator has approved a significant battery storage system totalling 120MW across three locations to enhance grid stability and security, marking a crucial step for the island's ...

Well, the 2025 Nicosia Energy Storage Pilot in Cyprus might just have cracked the code. Operational since January 2025, this 250MW/1.2GWh lithium-ion battery system isn't your average power bank - ...

Cyprus has commissioned its first major battery energy storage system (BESS). Discover the 50 MW project's partners, technical details, and impact on grid stability and renewables.

Cyprus is rapidly embracing energy storage solutions to support its renewable energy transition and ensure grid stability. This article explores the latest advancements, challenges, and opportunities in ...

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

Cyprus has taken a step toward modernizing its energy infrastructure with the commissioning of a 3.3 MWh BESS as part of the Apollon PV Park. Operated by the University of ...

In an ambitious move towards a sustainable energy future, Cyprus is set to operationalize its first large-scale electricity storage system within the next 16 months.

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy Storage Systems is ...

Cyprus has recently inaugurated its first significant battery energy storage system (BESS), marking a pivotal step in enhancing the integration of renewable energy sources into the national grid.
