

China Petroleum and Chemical Corp, the world's largest refiner by volume, also known as Sinopec Group, started construction of the company's first onshore wind power project, the Dali ...

Small scale wind turbine Dali is a fully integrated wind energy solution designed to yield maximum energy at a given rotor diameter. It is installed on a design- and patent-protected 12 metre Dali XII ...

Under the test of newcomers, the wind energy design concept of microelectronics is very brilliant, and the use of infrared color point ignition characteristics is helpful for their promotion.

Please refer to our Further Information on SD-Tool.

The optimization design of wind power generation technology and the introduction of industrial wind energy will be one of the designs of Chengdu in the next 2~3 years.

The "Sunshine Center" can effectively optimize the secondary design of wind turbines, axial motors, and the unified community on the north bank in wind power generation through flexible ...

Dali PowerTower Performance is a hybrid power plant designed to maximize efficiency in local energy production. The wind turbine and solar panels are installed on a design and patent-protected 12 m ...

The DALI is a fully integrated, utility-connected (on- and off grid) small wind turbine, designed specifically for powering homes and small businesses with renewable ...

Operational Onshore wind farm Developer: China Datang Corporation renewable Power Co Part #2: City: Hexigten Qi 28 turbines: Neg Micon NM48/750 (power 750 kW, diameter 48.2 m) ...

China Huaneng Group and Sinohydro are currently owning the project. The project generates 143,304.9MWh electricity thereby offsetting 89,000t of carbon dioxide emissions (CO2) a ...
