

Examples of multiple design options with similar shading performance for latitude 6 S represented by the city of Dar es Salaam, Tanzania (6° 48' S, 39° 17' E) are presented in this section for overhang and fins.

With our calculation software, you can verify the improved structural resistance achieved through the use of Solarbloc® deflectors--delivered through a lightweight, simple and robust installation system.

The use of sun control and shading devices is an important aspect of many energy-efficient building design strategies. In particular, buildings that employ passive solar heating or daylighting often depend on well-designed sun control and shading devices. During cooling seasons, external window shading is an excellent way to prevent unwanted solar heat gain. See more on wbdg.
