

## Distributed and behind-the-meter energy storage in Hungary

Teplöre is proud to announce the successful commissioning of its first Battery Energy Storage System (BESS) project in Budapest, Hungary. This milestone marks a significant step in our ...

The 14 energy sources we have studied have been categorized according to whether the power plant generates electricity from thermal or renewable energy and pumped-storage power ...

Situated at the Dunamenti Power Station in Székesfehérvár, the new battery energy storage system builds on MET Group's earlier 4 MW / 8 MWh demonstrator plant installed in 2022 ...

MET Dunai Energiatársaság, a member of the Swiss-based MET Group, is building an energy storage system with a total nominal capacity of 40 megawatts (MW) and a storage capacity of ...

Read about the key role played by the Hungarian Energy and Public Utility Regulatory Authority (MEKH) in facilitating the battery energy storage in Hungary through developing detailed rules of the domestic ...

During this webinar, our expert speakers will analyze the tender results, what they mean for the future of Hungary's BESS market, and what investors can expect for the years to come in terms of the ...

Met Group Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Swiss-based energy company MET Group has officially inaugurated Hungary's largest standalone battery energy storage system (BESS) at its Dunamenti Power Station in ...

The scheme aims at enhancing the flexibility of the Hungarian electricity system by supporting storage investments to facilitate smooth integration of high capacity of variable renewable energy sources in ...

The Hungarian Ministry of Energy has announced that around 50 grid-scale energy storage projects with a cumulative capacity of 440 MW have received subsidy support through a ...
