Overview Access to electricity Electricity supply and demand Service quality Responsibilities in the electricity sector Sector policy Renewable energy History of the electricity sector Access to electricity is usually constrained by a country's level of income; however, in the case of Guyana, it is estimated that the electricity system in Guyana services only about 60 percent of the population, well below the level achieved by many regional peers. Similarly, while electrification is higher in coastal towns with a high industry concentration, there are vast areas of the country that appear underserved on this account. Even companies within regional access to the grid have to wait up to 99 ...
