

The Energy Storage System Design Workshop offers an in-depth exploration of the principles and practices involved in designing effective energy storage solutions.

The Workshop program is conceived to provide a multidisciplinary overview of this exciting world and a forum to meet and share ideas, comparing different storage solutions (batteries, ...

This course on energy storage essentials is intended for professionals wishing to acquire a comprehensive overview of grid-connected energy storage and energy storage systems, and to have ...

A review of the principles used to design fully functional battery systems, including land sizing, layouts, single-line diagrams, degradation/augmentation, and evaluation of BESS use cases.

This session examined innovations in renewable energy storage, such as batteries, pumped storage, and sands and market mechanisms to facilitate their development and scaling up.

The workshop will discuss overall operational safety of BESS systems, in addition to existing barriers, challenges, and successes regarding battery storage projects in California.

These webinars, custom-designed in close collaboration with regulatory commission staff, have already engaged regulators from over a dozen states on topics including energy storage technologies, ...

Advance your knowledge and skills in energy storage systems with Pertecnica Engineering's specialized workshops. Contact us today to learn more and register for our upcoming sessions.

Eventbrite - Storlytics Energy Storage presents 2025 Design of Grid Energy Storage Projects Master Workshop - Tuesday, May 27, 2025 - Find event and ticket information.

The first workshop, "Battery Energy Storage Systems (BESS) 101," runs 10 a.m. - noon, and outlines the benefits of BESS related to safety, planning and permitting processes and ...
