

European guy made his own solar power plant

In 1891, Baltimore inventor Clarence B. Tholstrup made the first transcontinental journey on a solar-powered car, "The Quiet Achiever". Commercial concentrated solar power plants were first developed in the 1980s, and ...

The solar power plant's pioneer is Frank Shuman. Unfortunately, he developed this technology when cheap oil was discovered.

The BBC's David Shukman reports from Europe's first commercial power station powered by the Sun.

With energy prices jumping 18% year-over-year, an American expat in Spain recently demonstrated how to build a functional 1kWh/day solar power plant using 85% recycled materials.

Among them was a man with a revolutionary idea: harnessing the inexhaustible power of the sun to produce clean and sustainable energy. Frank Shuman, an American engineer and inventor, conceived a project ...

The world's first solar power station was built before World War One, created by a man with a vision for cleaner air.

Shuman died in 1918 and, when vast and easily accessible oil deposits were discovered in Iraq and Iran after the war, his dream of cheap, clean solar power was buried with him.

After a year of lab experiments, in the summer of 1907 Shuman built a small-scale demonstration plant in his backyard in Tacony, a suburb of Philadelphia.

Egypt's 1913 solar power plant was built when sustainability and good environmental practices were not of concern. Despite this lack of environmental focus, Frank Shuman and his Sun Shine Power Company did ...

He demonstrates how to build a 3.2 kWp installation for under EUR3,000. Cost is the strongest argument in favor of do-it-yourself solar. The installation built by this homeowner totals EUR2,700,...
