China has officially unveiled the world's biggest solar farm to date. It's so big that it can cover two particular countries from different continents.

The world's biggest solar plant has come online in China, capable of powering a small country with its annual capacity of more than 6 billion kilowatt hours. The facility in a desert region of...

To maximize the utilization of renewable energy (RE) as much as possible in cold areas while reducing traditional energy use and carbon dioxide emissions, a three-layer configuration optimization...

China has just connected what it believes to be the world's biggest solar power plant to the grid in northwestern Xinjiang.

Located in a desert area of Urumqi, capital of the famously troubled Xinjiang Uyghur Autonomous Region in Northwestern China, the 3.5-gigawatt-capacity plant is slated to generate about 6.09...

A Chinese state-owned company said on Monday it had connected the world's biggest solar plant to the grid in northwestern Xinjiang.
