

Recently, Dingbo Power has obtained the patent certificate of a container silent diesel generating set fire protection system again after obtaining the utility model patent certificate for a ...

The casing body includes a seat or channel having a form suitable for receiving the canister-shaped gas generator. The seat may be cylindrical or have another shape suitable for ...

Referring to the figures generally, the various embodiments disclosed herein relate to systems, apparatuses, and methods for a generator set contained within an International ...

Thus, it is desirable to maximise the size (hence, output) of the generator installed in any given size of container, so that more power can be delivered for the same cost.

Following below are more detailed descriptions of various concepts related to, and implementations of, methods, apparatuses, and systems for a containerized generator set.

WO2024215662 - RADIONUCLIDE GENERATOR. A method of generating a radionuclide includes receiving a container in a container receptacle of a radionuclide generator, and moving the ...

United States Patent Des. 239,120 Patented Mar. 9, 1976 239,120 CONTAINER FOR RADIOSOTOPE GENERATOR

The invention relates to a device for interrupting a multi-phase current path between a generator and a transformer comprising an outer housing, said device having a multi-phase distribution...

PROCESS FOR THE SEPARATION OF RADIOACTIVE IODINE 132 FROM FISSION TELLURIUM 132  
Patent &#183; Tue Nov 21 23:00:00 EST 1961 &#183;OSTI ID: 4833559 PROCESS FOR SEPARATING IODINE ...

The present disclosure provides a diesel generator container with an integrated wiring harness interface, aiming to solve a problem of easy wiring errors caused by manual wiring.
