

Germany sets record for solar power generation

Wind power recorded an annual increase of five billion kilowatt hours or 12 percent, accounting for 38.5 percent of Germany electricity. Solar power production rose by 1.4 billion kilowatt ...

(Bloomberg) -- Germany's expanding array of solar panels set a new generation record as renewables take a larger share of power output from more expensive fossil fuels. Production reached ...

Solar farms are set for a record stretch of power sector dominance in Germany after becoming the single largest generation source in the country at the earliest point of the year ever.

Germany has marked a significant milestone in renewable energy by producing a record 45 gigawatts (GW) of solar power on June 15, 2024. This achievement supplied about 50% of the ...

Germany's many thousands of solar panels set a new production record on Monday. Output reached as much as 47,817 megawatts (47.8 GW) just before noon Berlin time, according to ...

Germany achieved a record share of wind and solar in its electricity mix over the first nine months of 2024, exceeding fossil fuels for the first time. New solar capacity additions in the first nine ...

Solar power generation saw a record month in June 2023 with 8.5 million MWh, more than a quarter (27.3 percent) of the electricity fed into the grid that month.

Germany has once again demonstrated its leadership in renewable energy by installing 16.2 GW of new solar capacity in 2024, bringing the total to an impressive 99.3 GW by the end of the ...

Germany's electricity generation from renewable sources reached a historic high in 2024, accounting for a remarkable 62.7% of the total share. Solar energy contributed a new record of 72.2 terawatt-hours ...

Germany achieved a major milestone in its energy transition in 2024, with renewable energy sources contributing 62.7% of the country's net public electricity generation, according to a ...
