

**Rapid growth in battery storage capacity** The substantial investments in grids and storage are set to drive remarkable growth in global battery storage power capacity.

Our new ranking of the top global markets for BESS investment can guide strategies, and four factors can help potential investors frame their approach. The US, China Mainland and Germany take the ...

The battery energy storage market continues its rapid growth, reshaping power systems worldwide. After a historic 2025, when global BESS capacity surpassed 250 GW and overtook ...

Estimates indicate that global energy storage installations rose over 75% (measured by MWhs) year over year in 2024 and are expected to go beyond the terawatt-hour mark before 2030.

Global investment in EV batteries has surged eightfold since 2018 and fivefold for battery storage, rising to a total of USD 150 billion in 2023. About USD 115 billion - the lion's share - was for EV batteries, ...

The global battery energy storage system (BESS) market is experiencing strong growth due to multiple converging factors. Increasing integration of renewable energy sources, such as solar and wind, ...

Battery storage investments in 2025 are experiencing unprecedented growth, reshaping the global energy transition and corporate ESG strategies. The surge is not only a response to the ...

**Clean energy supply chain investment** Clean energy supply chains, including equipment factories and battery-metal production assets, saw \$130 billion in investment in 2024, a dip compared to a year ...

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil.

Global battery energy storage (BESS) investment reached \$65.6 billion in 2024, driven by falling battery pack prices and surging demand for reliable, flexible clean energy solutions.
