

Gundam 00 Solar Power Generation System

Mobile Suit Gundam 00 (????????00(?????), Kidousenshi Gandamu Daburu?) is the seventh incarnation of the long running Gundam anime series. ... in the form of a large-scale solar power generation system based on ...

This is a list of technology from the Anno Domini timeline of the Gundam series Gundam 00. In a future where fossil fuels have run low, solar energy is the vital alternative to fighting over resource deposits.

Although fossil fuels have been depleted, humanity has obtained a new source of energy to replace them, in the form of a large-scale solar power generation system based on three huge orbital elevators.

A Gundam Nucleus (GN) Drive (aka solar reactor, solar furnace) is a powerful energy system within Mobile Suit Gundam 00 designed to give a mobile suit a significant advantage in combat.

During this time, 3 orbital elevators with solar power generation systems are built, each under control by the Union of Solar Energy and Free Nations (formerly United States of America), the Human Reform League ...

It raises a question of whether GN Drives can constantly meet the power requirements of the MS or whether the GN Drives power a battery-esque system, which the MS draws upon for its uber-power ...

Gundam units in the franchise are powered by different fictional reactors depending on the series: the GN Drive (a "solar reactor" using baryonic decay and GN particles) is the signature powerplant in Mobile ...

The Twin Drive System (or Twin Drive) is a next-generation drive system in Mobile Suit Gundam 00 that synchronizes two GN Drives to exponentially increase their GN Particle generation ...
