

How many times can the locker barcode be scanned

How many times can a QR code be scanned?

QR code scans may or may not have limits, depending on the QR code type and the QR code generator software used in creating them. Static QR codes are permanent once generated and do not have a scan limit. You can scan them as many times as you like. Most dynamic QR codes also have unlimited scans.

Do QR codes have a scan limit?

If you want to find a good reason to have limits on QR code scans, promos are one. Companies can use QR codes to offer limited-time promos such as freebies and discounts. They can then add a scan limit to their QR codes so that they will automatically expire once they reach the maximum number of scans.

How do I set a scan limit to my dynamic QR code?

If you're already a QR TIGER subscriber, follow this guide so you can put a scan limit to your dynamic QR code: 1. After creating your dynamic QR code, click the 'Done editing/Download' button. This will direct you to the Dashboard.

What is multi-barcode scan?

Multi-barcode scan is a smart data capture feature integrated into Unitech devices, designed to scan and analyze multiple barcodes simultaneously. With the built-in barcode engine and Multi-barcode scan feature of Unitech device, users can read up to 10 barcodes at once, significantly saving time compared to scanning each barcode individually.
