 Before you begin, you should know that you can only get 12 volts (direct current, i.e., DC) when you use solar panels. So, you'll require 220 volts to light your home's bulb (alternating current, i.e., AC). Therefore, the process will need to convert the current from 12V (DC) to 220V (AC) current. Thus, you'll need an inverter to accomplish that. Y...
