

How to install photovoltaic panels on tiled roofs

How do you install solar panels on a tile roof?

The entire solar mounting system must bypass the tiles. This is typically achieved using specialized tile roof hooks. These hooks are designed to slide underneath a tile and anchor directly into the rafter. The hook's arm then extends out from under the tile, providing a solid attachment point for the rail system above the roof surface.

Should you install a solar racking system on a tile roof?

Investing in a high-quality, certified solar racking system is investing in the safety, longevity, and success of your project. **Never Mount Directly on Tiles:** Always use specialized tile roof hooks to anchor the mounting system to the roof rafters, bypassing the tiles completely.

How do you install a tile roof?

Lift the Tile: Carefully slide the tile directly above the installation point upwards to expose the underlayment. **Don't remove it completely unless necessary.** **Position and Drill:** Place the base of the roof hook over the marked rafter. Drill pilot holes for your lag bolts. This prevents the wood from splitting and ensures a stronger grip.

How do you install a solar panel?

The installer places the solar panel onto the rails. Then, they slide the clamps into the channel on the rail and position them over the panel's frame. Using a torque wrench is highly recommended. The panel manufacturer will specify the correct torque settings for their frames.
