

How to plant artificial grass with photovoltaic panels

Whether you are in the process of designing your lawn or already have a manufactured lawn, the first and most important question is whether or not it is even possible to plant living plants in artificial grass.

Options exist from very low maintenance management of ground cover to more intensive agricultural production systems. Even with low maintenance systems, pre-planning has numerous ...

Here, we investigated soil and vegetation characteristics to assess the different impacts of PV arrays, fencing, and free-grazing on restoration in the degraded grassland in the Songnen Plain, ...

You've probably seen those vast solar farms stretching across fields - but have you ever wondered what's happening beneath those gleaming panels? Well, it turns out the choice of turf ...

The paper outlines the potential benefits and challenges when photovoltaic (PV) arrays are located in grassland ecosystems. The findings are particularly relevant when considering drought in ...

If you have lived in a home with a trampoline in the backyard, you may have observed the unreasonably tall grass growing under it. This is because many crops, including these grasses, ...

Deserts would appear to be the perfect place to install a solar photovoltaic (PV) plant -- they have high levels of solar irradiance and no limitations on space to install panels.

Let wildflowers grow and plant clover. The soil under the panels retains more moisture because of the shade so they will help the plants grow more. Honeybees will thrive and they need all ...

Yamaguchi prefecture was trying to find a way to get rid of tedious grass-mowing tasks for its farmers, and turn unproductive areas into resources. In April, the prefecture installed a 2.7-kW weed ...

We offer several seed mixtures tailored to be used alongside a solar park project, which are designed to be both low maintenance and long term. By removing some of the taller species such as cocksfoot ...
