

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

How do you mount a solar panel?

To mount a solar panel, use the wing nuts, flange nuts, and module bolts to fasten the solar panel to the panel mounting rails. Ensure the rail size for your mounting system is different if not 22-28 inches. Double check to ensure the panel is secure and then use the wing nut and knob to connect the panel mounting rails to the surface mounting rails.

How to install a solar panel?

To install a solar panel, first apply adhesive on one of the corner brackets. Align it to a corner of the solar panel and press firmly. Repeat this step for the other three corner brackets. Let the adhesive dry according to the product specifications.
