

When you think of cutting-edge energy storage, North Korea might not be the first country that comes to mind. But here's the twist: this isolated nation has been quietly developing energy ...

Energy storage systems, consisting of racks of battery modules regulated by management software, help national electricity networks -- as well as individual homes, businesses ...

An energy storage system with higher energy density is needed in the 5G era. Intelligent lithium batteries that combine cloud, IoT, power electronics, and sensing technologies will become a ...

Huawei has intensified its ambitions in advanced energy storage by patenting a sulfide-based solid-state battery capable of achieving driving ranges of up to 3,000 kilometres and ultra-fast ...

Huawei is making bold claims in the race for next-generation electric vehicle batteries, but are they too good to be true?

The Ulsan Substation Energy Storage System is a 32,000kW lithium-ion battery energy storage project located in Namgu, Ulsan, South Korea. The rated storage capacity of the project is 8,000kWh.

Huawei's intelligent lithium battery solutions provide dynamic peak shifting, transforming traditional backup power systems into efficient energy storage solutions that enhance system flexibility ...

Huawei Digital Power has said it will supply battery energy storage system (BESS) technology to what is thought to be the world's largest off-grid energy storage project to date.

The Nongong Substation Energy Storage System is a 36,000kW lithium-ion battery energy storage project located in Dalsung, Daegu, South Korea. The rated storage capacity of the project is 9,000kWh.
