

Hungary has officially announced a large-scale residential battery energy storage subsidy program, signaling a major acceleration of energy storage deployment across Central and Eastern ...

Liquid cooling energy storage systems play a crucial role in smoothing out the intermittent nature of renewable energy sources like solar and wind. They can store excess ...

Hungary's largest operating standalone battery energy storage system (BESS) has been inaugurated today: MET Group put into operation a battery electricity storage plant with total nominal ...

Hungary-based Heatventors Ltd. has developed a non-flammable thermal energy storage system that can reportedly save up to 90% of space compared to traditional storage technologies or ...

At the Soroksár site, new liquid-cooled technology has doubled storage capacity, enabling more green energy integration and improving the stability of the domestic electricity grid.

Read about the key role played by the Hungarian Energy and Public Utility Regulatory Authority (MEKH) in facilitating the battery energy storage in Hungary through developing detailed rules of the domestic ...

The scheme aims at enhancing the flexibility of the Hungarian electricity system by supporting storage investments to facilitate smooth integration of high capacity of variable renewable energy sources in ...

Discover how SolaX TRENE 1MWh liquid-cooled energy storage delivers high efficiency, reliability, and predictable returns for European C& I users.

We prioritize innovation and quality, offering robust products that support seamless telecommunications operations worldwide. The European Commission has approved a EUR1.1 billion Hungarian scheme to ...

In this article, our energy storage expert has selected the most promising energy storage companies of 2024 and demonstrates how their technologies will contribute to a smart, safe, and carbon-free ...
