

In 2021, we launched a programme to enable all supply partners to consume 100% renewable electricity. Initially the programme was introduced for our direct suppliers in Poland, China and India.

We develop, construct, acquire and operate utility-scale wind, solar and storage projects and sell renewable energy to reduce the climate footprint of Ingka Group and the IKEA value chain.

Sustainability investments include material innovation, electrification of transport, and renewable energy expansion. IKEA increased the share of renewable electricity in production to 75% ...

Since 2009, Ikea has invested over EUR4.2 billion (\$4.9 billion) in renewable energy initiatives, now supplying 75% of the electricity needed for its manufacturing, transportation, and ...

Inter IKEA Group's new CSRD manual standardises sustainability metrics, enhancing oversight of climate- and energy-related data. As a foundation-owned organisation, Ingka can ...

IKEA's largest retailer, Ingka Group, has announced an additional EUR1.5bn investment to accelerate its transition to IKEA renewable energy solutions and eliminate reliance on fossil fuels in ...

When the company started working on renewable energy, it made the most sense to own renewable energy directly, and Ikea stores are now plastered with more than 900,000 solar panels. It ...

Timed for the UN Climate Action Summit in New York next week, IKEA's holding company Ingka Group revealed that it has invested EUR2.5 billion (\$2.76 billion) in solar and wind energy systems over...

In the U.S., the company currently owns over 250,000 solar panels across 90% of its locations, two geothermal properties, seven fuel cell arrays and two wind farms which produce more ...

Solar energy also plays a significant role in IKEA's renewable energy production, with 80% of IKEA stores already equipped with solar panels. These panels produce 20% of IKEA's energy ...
