

Record-low bids to build battery energy storage systems in India have sparked fears that some projects could be economically unviable and even pose safety risks, industry experts and...

Listed below are the five largest energy storage projects by capacity in India, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...

This state-of-the-art energy storage solution is designed to support India's clean energy transition and strengthen the reliability of country's power infrastructure.

Built on lithium-ion battery technology, the system is being integrated with advanced energy management tools to optimize performance and reliability. Once completed, it will enhance ...

Discover how the New Delhi lithium battery energy storage project is revolutionizing India's renewable energy landscape--and why it matters for industries worldwide.

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about ...

The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone BESS project.

Battery Energy Storage System is Crucial for India's Energy Transition The emergence of Battery Energy Storage Systems highlights the need for adaptability and long-term thinking in ...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

Battery Energy Storage Systems (BESS) make it possible to store solar and wind power and use it when it is needed most. With increasing government support and clear targets, India's ...
