

Iranian energy storage power supply price

How much energy does Iran use a year?

Energy consumption has stabilised since 2018 and stood at 274 Mtoe in 2021. It grew by +3.7%/year between 2010 and 2018. Iran aims to develop its hydrocarbon resources, particularly its gas exports, which have been slowed due to the COVID-19 pandemic in 2020, on top of the renewed US sanctions and increased geopolitical tensions.

Who controls the energy sector in Iran?

The Ministry of Energy is in charge of the electricity sector and oversees the energy efficiency and renewables policy. Tavanir (Iran Power Generation, Transmission and Distribution Management Company) is the vertically integrated national electricity company and controls 16 regional electricity companies.

How will Iran's power exports be multiplied by a factor of 7?

The country plans to multiply power exports by a factor of 7 by 2026. Iran is the world's 9th largest CO₂ emitter. The power sector is controlled by state-owned companies Tavanir, TPPH, and WRM. Iran has the world's second largest gas reserves, about 40% of which comes from the South Pars field.
