

Is anyone installing photovoltaic panels now

Are global solar installations on track for another record year?

Global solar installations are on track for another record year. In the first six months of 2025, the world added 380 GW of new solar capacity -- 64% higher than during the same period in 2024, when 232 GW were installed.

Can solar panels be installed on a roof?

To get the most out of your system, ensure your home can accommodate solar panels before installing them on your roof. Your roof's shading, orientation and angle towards the sun, and age contribute to its potential for generating solar energy. In a perfect world, your panels would face south and tilt between 15 and 40 degrees.

Should you wait to install solar panels?

Waiting to install solar panels means waiting to save on your energy bill, and continuing to pay more for that energy as prices rise. In 2022, residential electricity price has increased on average at least by 2.7% when compared to 2021 in the U.S. .

Should you buy solar panels for your home?

In summary, purchasing solar panels for your home sooner rather than later is in your best interest as a homeowner. You can begin saving on electricity immediately and secure flat energy costs, rather than paying for ever increasing rates. You would also be entering the market at its lowest price point, before PV panels go up in cost.
