

Discover how Italy's latest policies and auctions are driving utility-scale solar and battery storage projects to meet ambitious 2030 targets.

The Italy utility-scale energy storage solution market is experiencing rapid growth driven by the country's commitments to renewable energy integration, grid stability, and decarbonization targets.

BESS technology has won the bulk of new resource contracts in the capacity market (CM) auction for delivery in 2027 in Italy.

Now, it's doubling down on grid flexibility through large-scale battery energy storage systems (BESS). With over 5 GW of BESS already installed and a government target of 50 GWh by ...

After a sharp decline recorded in the first few months of the year, the Italian storage system market showed signs of recovery in the second quarter, driven primarily by large,...

Italy's energy storage landscape is undergoing a major shift, with utility-scale battery energy storage systems (BESS) experiencing exponential growth in 2024, even as residential and ...

In December 2023, the EU approved Italy's EUR17.7 billion energy storage plan, aiming to build more than 9 GW/71 GWh of storage systems by 2033, with strategic plans for utility-scale storage in southern ...

Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years. The new storage capacity will be acquired through ...

As of Sep. 30, 2024, Italy had a cumulative 692,386 energy storage systems, with a total rated power of 5,034 MW and an energy storage capacity of 11,388 MWh. Almost all of the systems ...

The Italian legislator has intervened, specifically in the development of storage capacity, by introducing a long-term procurement system of utility-scale storage capacity based on ...
