

KUALA LUMPUR (July 2): Data centres in Malaysia may see their electricity bills rise by up to 15% under the new power tariff structure, analysts said.

The power industry's regulatory period review establishes, among others, the expected coal and gas prices that would determine the base electricity tariff in the three-year period.

Significant fixed costs for infrastructure and power plant maintenance are incurred regardless of electricity consumption, and these costs must be recovered through user charges, often ...

KUALA LUMPUR, December 27 -- Starting July 1, 2025, Peninsular Malaysia's base electricity tariff will rise by 14.2% to 45.62 sen per kilowatt-hour (kWh), as announced by Tenaga Nasional Berhad (TNB).

The base tariff has been revised to 45.40 sen/kWh under Regulatory Period 4 (RP4), effective from 1 July 2025 until 31 December 2027. This tariff reflects actual generation, transmission, ...

MISIF strongly urges the government to adopt greater transparency in itemizing and justifying the components that determine the base tariff, to prevent excessive benefits to the sole utility supplier.

Starting 1 July 2025, Malaysia will implement Regulatory Period 4 (RP4), a new electricity tariff structure that fundamentally changes energy pricing for commercial and industrial facilities. A more detailed ...

All about TNB's tariff rates. This information is valid until 30 June 2025. In line with the Electricity Tariff Restructuring effective from 1 July 2025, please visit <https://> for the latest ...

Under the IBR framework, the electricity in Peninsular Malaysia is made up of two main components, namely the base tariff and Automatic Fuel Adjustment (AFA) mechanism.

Read on for more information on Commercial Tariffs and Industrial Tariffs. There is also a section on tariffs for Mining, as well as the Specific Agriculture Tariff. Lastly, get information on TNB's Top-Up ...
