

# Modular Data Center Racks for Edge Computing

Our experts will design a pre-engineered data center tailored to your capacity, cooling, and scalability needs -- delivered with clear specs, timelines, and costs.

Deploy technology at the edge or anywhere your data is generated with modularized, integrated racks built outside traditional data center constraints.

All-in-one, self-contained, prefabricated micro data centers for edge computing. With up to 8kW of integrated cooling, EdgeRacks are ready to be deployed wherever you need them.

Built for demanding sites and on-prem workloads, our prefabricated modular data center solutions deliver 5-50 kW per rack. Multiple modular data center cooling options -- including free-cooling -- ...

Enter modular edge data centers, a game-changing solution that's reshaping how infrastructure is deployed at the edge. These prefabricated, factory-built systems are designed for ...

Vertiv uses modular integration techniques to tailor solutions for your edge applications.

Micro data centers with self-contained power, cooling, and security for powering low-latency and geo-specific edge applications. With modular data centers, DataBank can extend our Data Center ...

BMarko Structures designs and manufactures custom prefabricated modular data centers built to meet the growing demands of today's edge computing, cloud infrastructure, and AI workloads.

Deploy expandable, secure, and configurable edge data centers with engineered fabric buildings from Alaska Structures. Alaska Structures &#174; provides modular fabric buildings that offer unmatched ...

The growth of edge computing and distributed AI has increased demand for small data centers with shorter deployment cycles, lower costs and optimized capacity. This SmartRack&#174; Modular Data ...
