

No money for rural solar power generation

Driven by subsidies, mandates and federal and state policies compelling the use of more renewable energy, solar energy facilities are now displacing farmland at an increasing rate.

Learn how the USDA REAP program for rural solar projects supports funding for renewable energy. Get application tips and support options

Native Families Were Promised Free Solar. Trump Took It Away. Trump's gutting of the Solar for All program is deeply felt on the Northern Plains reservations.

Building wind and solar energy capacity in rural America isn't about politics, and it isn't about climate change. It's about money.

Most recently, the U.S. Department of Agriculture (USDA) said it would no longer support solar projects that take away viable farmland. That will make it harder for rural businesses and ...

Secretary of Agriculture Brooke Rollins announced that the USDA will no longer use taxpayer dollars to fund solar panel projects on productive farmland.

"We are no longer allowing businesses to use your taxpayer dollars to fund solar projects on prime American farmland, and we will no longer allow solar panels manufactured by foreign ...

But here's the problem: not everyone can afford the upfront cost. Luckily, the U.S. government has your back. Whether you're a low-income homeowner or a rural resident, there are ...

The program provides guaranteed loan financing and grant funding to agricultural producers and rural small businesses for renewable energy systems or to make energy efficiency improvements.

The SOMAH program provides financial incentives for installing photovoltaic (PV) energy systems on multifamily affordable housing. To learn more, visit the SOMAH website.
