

North Macedonia's new energy storage power source

The ministry approved 67 power plant projects, for facilities of at least 1 MW each, on a first-come, first-served basis. Another section is for co-located energy storage systems and ...

For North Macedonia to achieve its renewable targets, power lithium battery storage isn't optional - it's essential. From solar farms to industrial complexes, these systems provide the flexibility and ...

By adding solar power generation to the reservoir, the plant provides a reliable source of energy even during periods of low water levels, creating a powerful hybrid system. This project is part ...

This report, "North Macedonia Renewable Energy Market - 2025 Update", has been produced by Invest In Network as part of the Energy Week Western Balkans 2025 framework.

A new energy law adopted in May 2025 is expected to further accelerate the uptake of battery storage. State-led solar and wind projects, along with investments in grid infrastructure and ...

In this way, power plants that use variable renewable energy sources are obligated to install electricity storage facilities in the form of battery capacities, always ensuring the balance ...

The continued growth of solar power and the development of storage capabilities will play a decisive role in securing North Macedonia's energy independence and promoting a sustainable ...

North Macedonia's 2026 plan includes 67 power plant projects of at least 1 MW each, for investments totaling an estimated EUR 3.74 billion, and 96 acceptable proposals for standalone and ...

China-based Cubenergy will provide the energy storage systems while YESS Power will manage all engineering, procurement, installation, and commissioning phases. This BESS project ...
