

Supports self-consumption, peak-valley arbitrage, backup power, and other various scenarios. Max. DC input voltage. \*The data sheet will be changed according to actual situation without prior notice.

Equipped with a smart BMS and energy management functions, this ESS supports peak shaving, load shifting, and backup protection -- helping businesses reduce energy costs while improving power ...

Designed to support grid-tied and off-grid scenarios, the Hybrid ESS cabinet offers seamless integration and maximized space utilization, making it an ideal choice for growing energy demands.

Quadruple dimensional thermal runaway monitoring with precise core-level fire treatment. Thermal runaway combustible smoke is controlled to inhibit the spread of thermal runaway. System ...

Reliable Swappable power module, front-maintenance-only, replaceable cooling fans offers fast and prompt service.

50kW/100kWh outdoor cabinet ESS solution (KAC50DP-BC100DE) is designed for small to medium size of C& I energy storage and microgrid applications. Individual pricing for large scale projects and ...

This integrated cabinet combines power modules, batteries, cooling, fire protection, and smart energy management in a single rugged unit. This all-in-one outdoor ESS merges power, batteries, and safety ...

Designed for C& I applications, it combines a PCS, BMS, LiFePO<sub>4</sub> batteries, and EMS into a single, sleek cabinet to significantly reduce your energy costs and enhance power reliability.

This compact yet powerful energy storage commercial solution provides a versatile building block for distributed energy systems, EV-ready microgrids, and backup-critical operations.

The 50kW Smart Energy Storage Air-Cooled Integrated Cabinet, designed for commercial and industrial applications, features air-cooled thermal management, an intelligent BMS & monitoring system for ...
